

Technical Data Sheet

LUCRAMUL 12036

Versatile fatty alcohol ethoxylate

Description

LUCRAMUL 12036 is generally used as an emulsifier and wetting agent in different industrial applications such as household/industrial detergents and cleaning lubricants, paints and coatings, paper processing, agrochemical formulations.

Technical Data

Chemical description	Fatty alcohol polyglycol ether
Ionicity	Non ionic
Active content [%]	100
Form supplied	Liquid
Colour	Clear or slightly turbid
Density at 23°C [g/cm ³]	Approx. 0.93
Viscosity at 23°C [mPas]	35
pH value [5% solution in water]	5.5 – 8.0
Miscibility in water	No
Miscibility in organic solvents	Common organic solvents

The above data are typical product values and not necessarily specified.
For further details please refer to the relevant product specification.

Properties and Application Fields

LUCRAMUL 12036 can be applied in many application fields, when it is necessary to emulsify organic material in water. It has good compatibility with other non-ionic surfactants and with most anionic surfactants.

In agrochemical formulations **LUCRAMUL 12036** is commonly used in liquid agrochemical formulations such as (EC, EW, ME and SC). It provides as well wetting and penetration effects which promote and enhance the application of agrochemical formulations.

Technical Data Sheet

LUCRAMUL 12036

Dosage and Processing

The optimal dosage depends on various parameters (e.g. application, formulation) and has to be determined by tests.

Storage, Handling and Safety

LUCRAMUL 12036 has a shelf life of 24 months from delivery ex warehouse LEVACO in original closed containers and when stored under proper conditions.

For further information on safety, storage etc. please refer to the safety data sheet of **LUCRAMUL 12036** available at our company website www.levaco.com.

Packaging

The product is available in the following packaging:
1000 liter IBC
